## EXPERIENCE

**Buff Bros, Rancho Cordova, CA -** Web Development Lead & IT Consultant

November 2024 - February 2025

- Designed, developed, implemented, and managed the website for Buff Bros LLC utilizing Agile methodologies.
- Led sprint reviews, communicating progress and gathering product owner feedback to refine the backlog and ensure alignment with business goals.
- Provided IT consulting services, including software recommendations.
- Implemented SEO best practices to maximize website visibility and organic search rankings.

- Leveraging Cybersecurity best practices, I implemented MFA (Multi-Factor Authentication) to mitigate cyberattacks.

**Boise State University, Boise, ID -** Senior Capstone Project

January 2024 - May 2024

- Led a team in developing a comprehensive tutoring web application for the Boise State University College of Education's Literacy Lab.
- Utilized Agile methodologies (Scrum) to manage project scope, deadlines, and deliverables.
- Managed project tasks and communicated progress effectively with stakeholders.
- Engineered numerous front-end components leveraging the Angular framework and integrating them with the backend built on Golang and GIN.
- Designed and developed SQL queries and API endpoints that enabled secure and efficient data retrieval and management - this ensured optimized web application performance and functionality.

**Micron Technology,  Boise, ID** - Revenue Operations Intern

June 2023 - August 2023

- Created an automated data analysis and visualization solution using Microsoft Excel, empowering data-driven decision-making.
- Authored a detailed rebate operations manual using SAP for 100+ employees, streamlining workflow and improving efficiency.
- Collaborated effectively within an Agile team to deliver on sprint commitments.

**Enterprise Transformation Institute, San Francisco, CA** - Jr. Software Engineer

June 2020 - June 2023

- Developed and maintained software for data extraction, translation, and loading (ETL), automating processes to integrate applications and databases.
- Leveraged existing artificial intelligence models (chatGPT, Google Gemini, and Microsoft Copilot) for customized client CSR application integration.
- Utilized Jira for project tracking, issue management, and reporting.
- Performed penetration test activities to identify potential software vulnerabilities from Cyber attacks.
- Collaborated with cross-functional teams (product owners, business analysts) to translate business needs into technical solutions.

## EDUCATION

**Boise State University, Boise State**

- B.Sc in Computer Science (May 2024)
    - Minor in Applied Mathematics

## AWARDS

- Boise State College of Engineering Dean's List
- Boise State Blue Thunder Marching Band (Drumline)
- Archbishop Riordan High School National Honor Society
